

DOLFINA – A Ministry of Lucidity

A Fellowship of the Association of the Integrated Whole Person

DOLFINA MISSION STATEMENT

Dolfina is a new paradigm of Reality that serves everyone concerned with living their Life Dreams. We are a non-hierarchical support base for a network of people grounded in Lucidity. That means that we focus on being our inner selves in the outer lives. We are mutually co-creating reality in order to dream ourselves into existence. We live our lives through the nature of our beings. We live inside our luminous bodies so our lives are one in the present Space-Time-Continuum. Dolfina is an acronym - Dreaming Of Lucid Freedom IN America. The intent is to train individuals and groups to become lucid co-creators. Training techniques include shifting between the parallel dimensions of space-time through the multidimensional cosmos and experiencing the process as a group mind. The Dolfina Process is a set of techniques which will attune you to using your innate, maybe dormant, psychic abilities in order to maximize the living forces of being human in a community of humans. Dolfina - A Ministry of Lucidity, Nonprofit is chartered by the Association for the Integration of the Whole Person. Over twenty-three years ago, "AIWP was established because there was a need for people to join together in reaffirming their right to use knowledge and skills for serving self and others." (Melvin Suhd, Founder)

AIWP MISSION STATEMENT

The Association for the Integration of the Whole Person was founded so that spiritual persons, prepared to serve their communities, can do so in ways that ensure the blessings of self-empowerment, psychologically and educationally, leading to peace for persons of good will.

CREDO of the Association of the Integration of the Whole Person

Love of Life and people is achieved through an integrated awakening of physical, mental, spiritual, and emotional processes. Life itself is a religious experience as realized in the temple of my being. I am performing a religious service when my thoughts and deeds involve an affirmation of life. My congregation is both myself and those who seek my support in striving towards an integration of the whole person. To serve others, for fee or gratuity, who seek my assistance in the pursuit of this religious experience is both my commitment and my right, free from any persecution. My service is supported by the Association for the Integration of the Whole Person in agreement of principles with the Constitution of the United States and United Nations Declaration of Human Rights. Membership in the Association for the Integration of the Whole Person will be denied or revoked if I interfere with or injure the rights of others, perform criminal acts, or practice medicine without a license. My service, whether for fee or gratuity, is limited to the area for which I have been qualified.
